UPDATE/DELETE FEATURES

UPDATE PATIENT/DOCTOR

All Registration records except for IDs can be updated of patient and Doctor

SEARCH and DELETE FEATURE

Under Search Tab

Searching via IDs is possible for both PATIENT and DOCTOR(Ignore the error on screen, Try and Catch is having issues but code works perfectly)

Show all records also work.

Deleting Records of Patient/Doctor

Enter Patient_id/Doctor_id to delete the records.
Can be confirmed by Viewing all records or searching the specific ID
We have performed a soft delete so we are just changing the status bit =0
